

ADVANCED CERTIFICATE IN BONE AND TISSUE REGENERATION & SINUS GRAFTING COURSE WEBINAR: **CHROME Digital Work Flow**

Speaker Bio:

James has worn a variety of hats within the world of implant dentistry over the years and has gained significant experience in not only the clinical application, but the supporting commercial infrastructure. As a past practice owner where he built a very successful implant team accepting referrals from all over Ireland, James has more recently narrowed his clinical field to free up time to expand his other business interests. These are centered around education and the use of digital technology to enhance dental, and in particular, implant treatment workflows and ultimately patient outcomes.

An advocate of the significant advantages of guided implant surgery, James has recently brought to Europe the CHROME Guided Smile concept which is dedicated to full arch treatments. With now over 8000 arches treated in the USA and Canada using CHROME and a growing number of UK and Irish users, James is confident that this represents the future of full arch immediate load protocols.

James Hamilly - BDS MFDS DIP IMPL
DENT ITI Fellow

CEO Quintess Denta, Quoris 3D
Clinical Director for CHROME Guided Smile
(Europe)
