

Introduction to Dental Implant Nursing

1-day course

Course Fee: £ 150

CPD hours: 6

This CPD course meets the criteria for GDC
Development Outcomes B and C

Why attend this dental implant nursing course?

This one-day introductory course is designed for all UK-registered dental nurses, to provide an insight into dental implant treatment for both those new to implantology and those with some implant experience.

What will I learn?

This hands-on course covers all the essential elements needed to gain an overview of dental implant treatment:

- Exploration of what a dental implant is and how it interacts with the body
- Introduction to the indications and contraindications for implant dentistry
- Overview of the stages of dental implant treatment

This course is led by:

Prof. Simon Wright MBE BDS MSc
PGCTLCP FHEA FDTFEd (RCSEd)
SMFGDP(UK)A
